RAIL - THE NORTH EAST'S PREMIER RAILFREIGHT TERMINAL OPERATOR

With four combined rail terminals this 6-hectare site which includes the AV Dawson-operated Middlesbrough Goods Yard is one of the largest, most flexible rail freight facilities in the North of England.

Linked directly to the East Coast Mainline, it offers unique and market specific freight handling and storage:

- **The Ayrton Rail Terminal** specialises in bulk and dry goods, with rail connections to heated storage. Additional facilities include rail pit and conveyor discharge into warehousing, all just metres away from the mainline.
- **Tees Riverside Intermodal Park (TRIP) Terminal** offers loaded and empty container and tank handling and storage, vanning and devanning.
- **The North Sea Supply Base Terminal** offers quayside rail access to Teesport and AV Dawson's deepwater berths.
- **The Automotive Steel Store Terminal** provides a rail-link directly into a temperature and humidity controlled distribution centre for coil and plate used in automotive and yellow goods supply chains.

AV Dawson uses its extensive rail infrastructure alongside its experience of handling a wide range of rail borne cargos to enable you to benefit from the improved cost planning and efficiencies of transporting freight by rail. AV Dawson delivers further added value with local 'final mile' delivery provided by its extensive road haulage fleet.

More than 10km of working sidings transport goods to and from AV Dawson's various warehouses and quayside units, plus the neighbouring Tees Yard in Thornaby. AV Dawson's 6 hectare rail hub adjoins the local Middlesbrough Goods Yard exchange sidings where up to 100 wagons can be stabled.

The three leading rail freight operators DB Schenker, Freightliner Heavy Haul and GB Railfreight have partnerships with AV Dawson to service the facility, assisted by AV Dawson's own shunt locomotives.

RAIL FACILITIES

- One of the largest, most flexible rail freight facilities in the North of England
- Rail terminals at Teesport quayside
- Purpose built intermodal rail terminal in prime position in the heart of industrial Teesside
- Freight container and tank handling
- Handling and storage of intermodal units to and from trains and trucks
- Value added vanning and de-vanning and storage services
- Container servicing and repair
- Shunting to and from adjacent Middlesbrough Goods Rail Yard
- Reception sidings capable of handling up to 80 teu trains

- 16,000 square metres hard surfaced operational area and secure storage for up to 1200 teu
- Partnership support from the three leading rail freight operators
- Access to AV Dawson's 200 trailer road haulage fleet

LOCATION

- Riverside Park, near Teesport, in Middlesbrough, North East England
- Easy access to A66 & A19
- LAT 54 35 20, LONG 1 14 30
