ROAD - EXTENSIVE ROAD HAULAGE FLEET

With an extensive fleet of over 200 trailers to transport a wide range of cargoes, AV Dawson is well placed to support all of your road freight logistics requirements.

AV Dawson's road haulage team is serving rail terminals, ports and manufacturers across the UK. Current freight includes isotanks and containers, automotive steel coil, long steel, aggregates, fertilisers and waste including refuse-derived fuel (RDF). Customers include major global brands such as Caterpillar, MSC, Tarmac, Tata Steel and XPO Logistics.

All vehicles are fitted with the latest road management software with CCTV and track & trace systems, providing the capability to pinpoint the location of any vehicle in the fleet and deliver sophisticated just-in-time operations. All trailers are serviced and maintained by AV Dawson's in house team of mechanical fitters and drivers are all CPC compliant.

AV Dawson's Tees Riverside Intermodal Park (TRIP) can be used for short term storage to maximise fleet efficiencies. It provides loaded and empty container and tank handling and storage, vanning and devanning services.
