

APPROVED, EXPERT LOGISTICS

As an approved supplier to NNB HPC, we have the experience and expertise to offer you Customs' Consultancy and Freight Forwarding Services.

We've recently been appointed as NNB's Project Freight Forwarding Team and Customs Broker. We are moving equipment purchased by NNB and the associated alliance. So far, we have moved freight for the project from China, France and Spain, and now have shipments lined up in support of the NSSS Auxiliary Equipment Programme to achieve key project milestones.

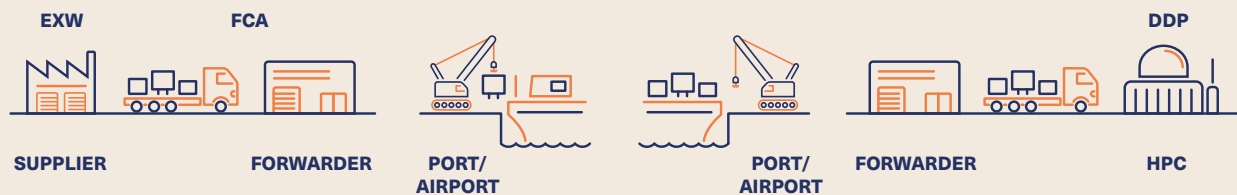

- We pride ourselves on helping clients to get critical assets of all kinds delivered on time and on budget.
- Teamwork is everything – by working closely with contract, project and commercial managers, we can often find efficiencies to support your programme.

IMPORT

All your freight tracking, on a cloud based system, for easy monitoring of multiple cargoes anywhere in the world, from factory to foundation.

Tank deliveries (OOG) from Spain to the UK using road transport. In supplying this option we saved the project a significant amount. We can assist with logistics pricing in the post Brexit period to help benchmark existing pricing and provide support during contract negotiations with suppliers.

Trashracks for U1 under the NSSS Auxiliary Programme, arriving in Portbury on a WWL RoRo service, en-route to J24 asset warehouse.

WAYS WE CAN SUPPORT YOUR PROGRAMMES

- We provide reach-back logistics outside of GENCO590 and are currently supporting both Tier 1 & 2 contractors such as Tissot & Efinor in delivering equipment to HPC.
- We've been appointed as Customs Agent to NNB for HPC, under GENCO590, to process and document equipment imports where NNB is the nominated Importer of Record.
- This includes handling imports related to Project Freight Forwarding shipments under FCA contract terms as well as acting as Customs Agent for equipment entering the UK under DDP contract terms.
- We can offer a complete multi-modal service; road, sea and air shipments and offer a customs consultancy service to help solve any out of the ordinary customs issues – especially in the post-Brexit period.
