OFFSHORE EXPERIENCE AND EQUIPMENT

THE UK'S LARGEST, INDEPENDENTLY OWNED
FLEET OF OFFSHORE BARGES

The oil, gas and low carbon industries set high standards. As critical assets need shipping in or out, specialist offshore logistics are more in demand. It pays dividends to choose a logistics partner with embedded expertise, a flexible approach – the determination to adapt our way of working so that it adds value to your project – and the right inventory.

- Load outs, load ins, decommissioning at scale.
- Cable logistics – support, delivery, and installation worldwide.
- Nearshore supply projects. Support for subsea construction of all kinds.

We now have the UK's largest fleet of flat-top barges. More recently, we've added specialist equipment to our inventory – a bespoke cabling carousel, for example. Our marine engineers can collaborate with your teams to plan and manage the most ingenious ways of transporting heavy assets and challenging, abnormal loads by sea or in-land waterways.

INNOVATION IN ACTION

THE 'OSPREY WAY OF WORKING' EMBODIES OUR EXPERTISE
WE FIND BETTER WAYS TO DELIVER YOUR ASSETS,
ONSHORE AND OFFSHORE

Working with Osprey, you'll be supported by an experienced team of naval architects, marine engineers, operators, planners and sector specialists. For 25 years, we've been delivering critical infrastructure on time and on budget, offshore. We don't believe in breaking good habits.

We've worked in the upstream, midstream and downstream sectors of oil and gas for many years – and this marine heritage brings you a significant advantage. Add to that, our experience with all kinds of low carbon assets (we have transported and engineered every component of an offshore wind farm) and you have specialist offshore logistics you can depend on.

We add value to every project, simply by drawing on previous experience. Often, we'll suggest an innovative, more efficient way of doing things, which delivers better results, faster. Osprey's barge teams have been setting the standards for 25 years too, with fully-engineered and resourced RORO, LOLO, and FLOFLO solutions, including all sea fastening design and fabrication as necessary.

Prioritising QHSE, we see each offshore project as a series of exciting challenges, just waiting to be overcome by using the right combination of owner-operated equipment and expertise. Sometimes, all it takes is a healthy dose of common sense to find a simple solution for the most complex problems. This is the Osprey Way of Working, or O-WOW for short. It's taken us 25 years to develop the way we work and the benefits of working 'better, together' just keep growing in value.

Every project has its moments. If there's something we need to get the job done, or a solution isn't obvious with the inventory we have, then our teams will find a new way to solve that problem.

Or, if we're confident of providing a better alternative, we'll put a new piece of kit into our roster; adapt what we have; or re-invent the 'usual' way of doing something completely. Owner-operated transport and equipment makes all the difference in these situations.

The two things we won't change are our people and our focus on QHSE. Many of Osprey's team have been with us for 25 years, safely and securely bringing the 'Osprey Way of Working' to life. We take pride in sharing all of that expertise with you, helping you to cut costs and time without cutting corners. It's how we deliver unexpected value from the outset.

“

**WHEN YOU NEED THE
RIGHT EQUIPMENT
OPERATED BY THE
RIGHT TEAM, WE ARE
THE TEAM TO CHOOSE**

John O'Connor,
Commercial Director

HELPING YOU TO FIND THE BEST SOLUTION

Improving the scope and scale of what we can achieve by working better, together.

USING THE RIGHT EQUIPMENT, SAFELY

We've built up an impressive offshore inventory and accumulated 25 years of QHSE knowledge.

FOCUSING ON FAMILY VALUES

We're proud of our family values, they keep us focused on bringing out the best in each other.

FINDING INNOVATION, EVERYWHERE

Often, the right solution is the simplest one. Sometimes, we develop bespoke approaches.

COLLABORATING THROUGHOUT

Drawing on experience, sharing our knowledge, we always try to deliver unexpected value.

INTEGRATED SOLUTIONS

Naval architects; mechanical, marine & civil engineers; project managers combine to deliver our multi-mode solutions.

ON TIME. ON BUDGET. SAFELY. EVERY TIME.

We work the same way you do, treating your assets just as if they were our own.
